

## TRADE ALERT

**Buy the Goldman Sachs (GS) *October 2025* \$680-\$690 in-the-money vertical bull call debit spread at \$8.70 or best**

### Opening Trade

**9-9-2025**

**expiration date: October 17, 2025**

**Portfolio weighting: 10% weighting**

**Number of Contracts = 12 contracts**

Look at every banking and financial chart in the market and they are breaking out to the upside. It is clear that traders believe a Fed interest rate cut on September 17 is a sure thing. Banks and financials are among the biggest beneficiaries of falling interest rates.

Therefore, I am buying the **Goldman Sachs (GS) *October 2025* \$680-\$690 in-the-money vertical bull call debit spread at \$8.70 or best.**

## DO NOT USE MARKET ORDERS UNDER ANY CIRCUMSTANCES.

Simply enter your limit order, wait five minutes, and if you don't get done, cancel your order and increase your bid by 10 cents with a second order.

If you don't want to sit in front of a screen all day or live in a foreign time zone when the US stock market is closed, such as Australia, or don't want to sit in front of a screen all day, simply enter a spread of **Good-Until-Cancelled** orders overnight, like \$8.70, \$8.80, \$8.90, \$9.00, and \$9.10. You should get done on some or all of these.

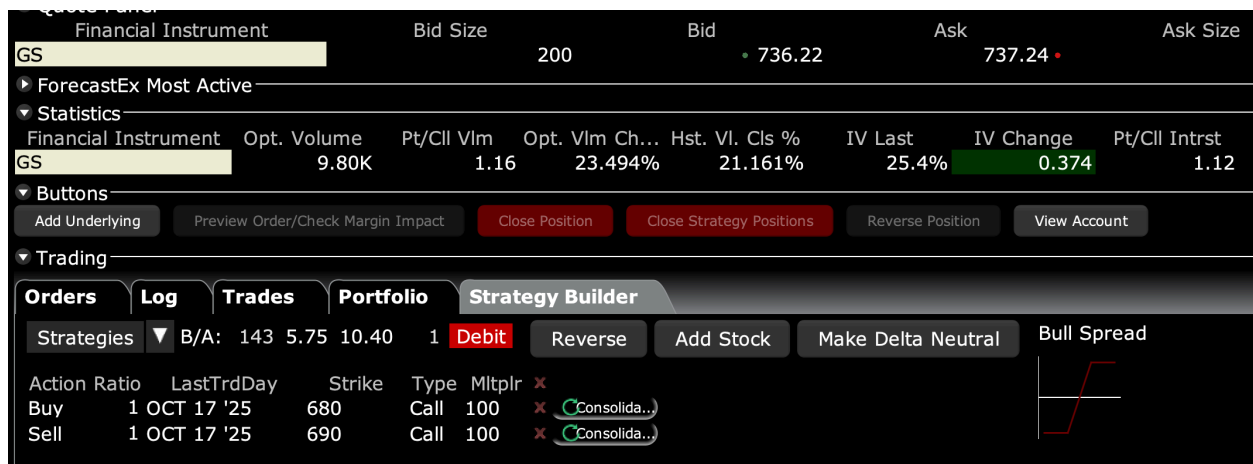

This is a bet that (GS) will not drop below \$690 by the October 17 option expiration in 28 trading days.

Here are the specific trades you need to execute this position:

**Buy 12 October 2025 (GS) \$680 calls at.....\$69.00**  
**Sell short 12 October 2025 (GS) \$690 calls at.....\$60.30**  
**Net cost:.....\$8.70**

Potential Profit: \$10.00 - \$8.70 = \$1.30

(12 X 100 X \$1.30) = \$1,560 or 14.94% in 28 trading days

To see how to enter this trade in your online platform, please look at the order ticket below, which I pulled off of *Interactive Brokers*.

If you are uncertain on how to execute an options spread, please watch my training video on "*How to Execute a Vertical Bull Call Spread*" by clicking here at

<https://www.madhedgefundtrader.com/ltt-vbcs/>

The best execution can be had by placing your bid for the entire spread in the middle market and waiting for the market to come to you. The difference between the bid and the offer on these deep in-the-money spread trades can be enormous.

Don't execute the legs individually or you will end up losing much of your profit. Spread pricing can be very volatile on expiration months farther out.

Keep in mind that these are ballpark prices at best. After the alerts goes out, prices can be all over the map.
