

Trade Alert - (GLD) – BUY

**BUY the SPDR Gold Shares (GLD) December 2025
\$355-\$360 vertical BULL CALL debit spread at \$4.50 or
best**

Opening Trade

11-28-2025

expiration date: December 19, 2025

Portfolio weighting: 10%

Number of Contracts = 25 contracts

The six-week correction in precious metals is grinding to a close as the December 10 Fed meeting approaches. The probability of a rate cut now stands at 90%.

It is all very gold positive.

If you can't do options, buy the stock. My long-term target for the barbarous relic (GLD) is \$500, up nearly a double from today's \$383.62.

Therefore, I am buying the **SPDR Gold Shares (GLD) December 2025 \$355-\$360 vertical BULL CALL debit spread at \$4.50 or best.**

Don't pay more than \$4.70 or you will be chasing.

DO NOT USE MARKET ORDERS UNDER ANY CIRCUMSTANCES.

If you don't want to sit in front of a screen all day or live in a foreign time zone when the US stock market is closed, such as Australia, or don't want to spend all day in front of a screen, simply enter a spread of **Good-Until-Cancelled** orders overnight, like \$4.50, \$4.55, \$4.60, \$4.65, and \$4.70. You should get done on some or all of these.

The bull case for gold is simple. Falling interest rate means less yield competition for gold, which yields nothing. China and Russia have been stockpiling gold for years to avoid international financial sanctions. The only way the Chinese can save right now is to buy gold.

A global gold shortage is developing, with new mine costs rising. Gold also offers protection against rising US debt, which is expected to hit \$35 trillion shortly.

On top of all this, Chinese speculators have shifted their principal savings vehicle from real estate, which has crashed and has no future, to gold. This adds a large retail element that has never existed before.

SPDR Gold Shares (GLD) is a play on physical gold. They are shares in a corporation that owns 400-ounce gold bullion bars held by a London trust. It is far safer owning gold through the (GLD) than owning your own physical gold bars via a third-party custodian. If the custodian goes under, which is frequent, your gold is gone. With (GLD), your credit risk is with State Street, a highly rated firm with a strong balance sheet.

For details about SPDR Gold Shares (GLD), please visit their website at <https://www.spdrgoldshares.com>.

This is a bet that the (GLD) will not fall below \$360 by the December 19 option expiration in 15 trading days.

Here are the specific trades you need to execute this position:

Buy 25 December 2025 (GLD) \$355 calls at.....\$30.00
Sell short 25 December 2025 (GLD) \$360 calls at.....\$25.50
Net Cost:.....\$4.50

Potential Profit: \$5.00 - \$4.50 = \$0.50

(25 X 100 X \$0.50) = \$1,250 or 11.11% in 15 trading days.

To see how to enter this trade in your online platform, please look at the order ticket above, which I pulled off of *Interactive Brokers*.

If you are uncertain on how to execute an options spread, please watch my training video on “*How to Execute a Vertical Bull Call debit Spread*” by clicking here:

<https://www.madhedgefundtrader.com/ltt-vbcs/>

The best execution can be had by placing your bid for the entire spread in the middle market and waiting for the market to come to you. The difference between the bid and the offer on these deep in-the-money spread trades can be enormous.

Don't execute the legs individually, or you will end up losing much of your profit. Spread pricing can be very volatile on expiration months farther out.

Keep in mind that these are ballpark prices at best. After the alerts go out, prices can be all over the map.
